

A woman with long blonde hair, wearing a light blue bikini and scuba gear, is sitting on a rocky cliff. She is looking out over a turquoise ocean. The background shows a clear sky and some distant structures on the horizon.

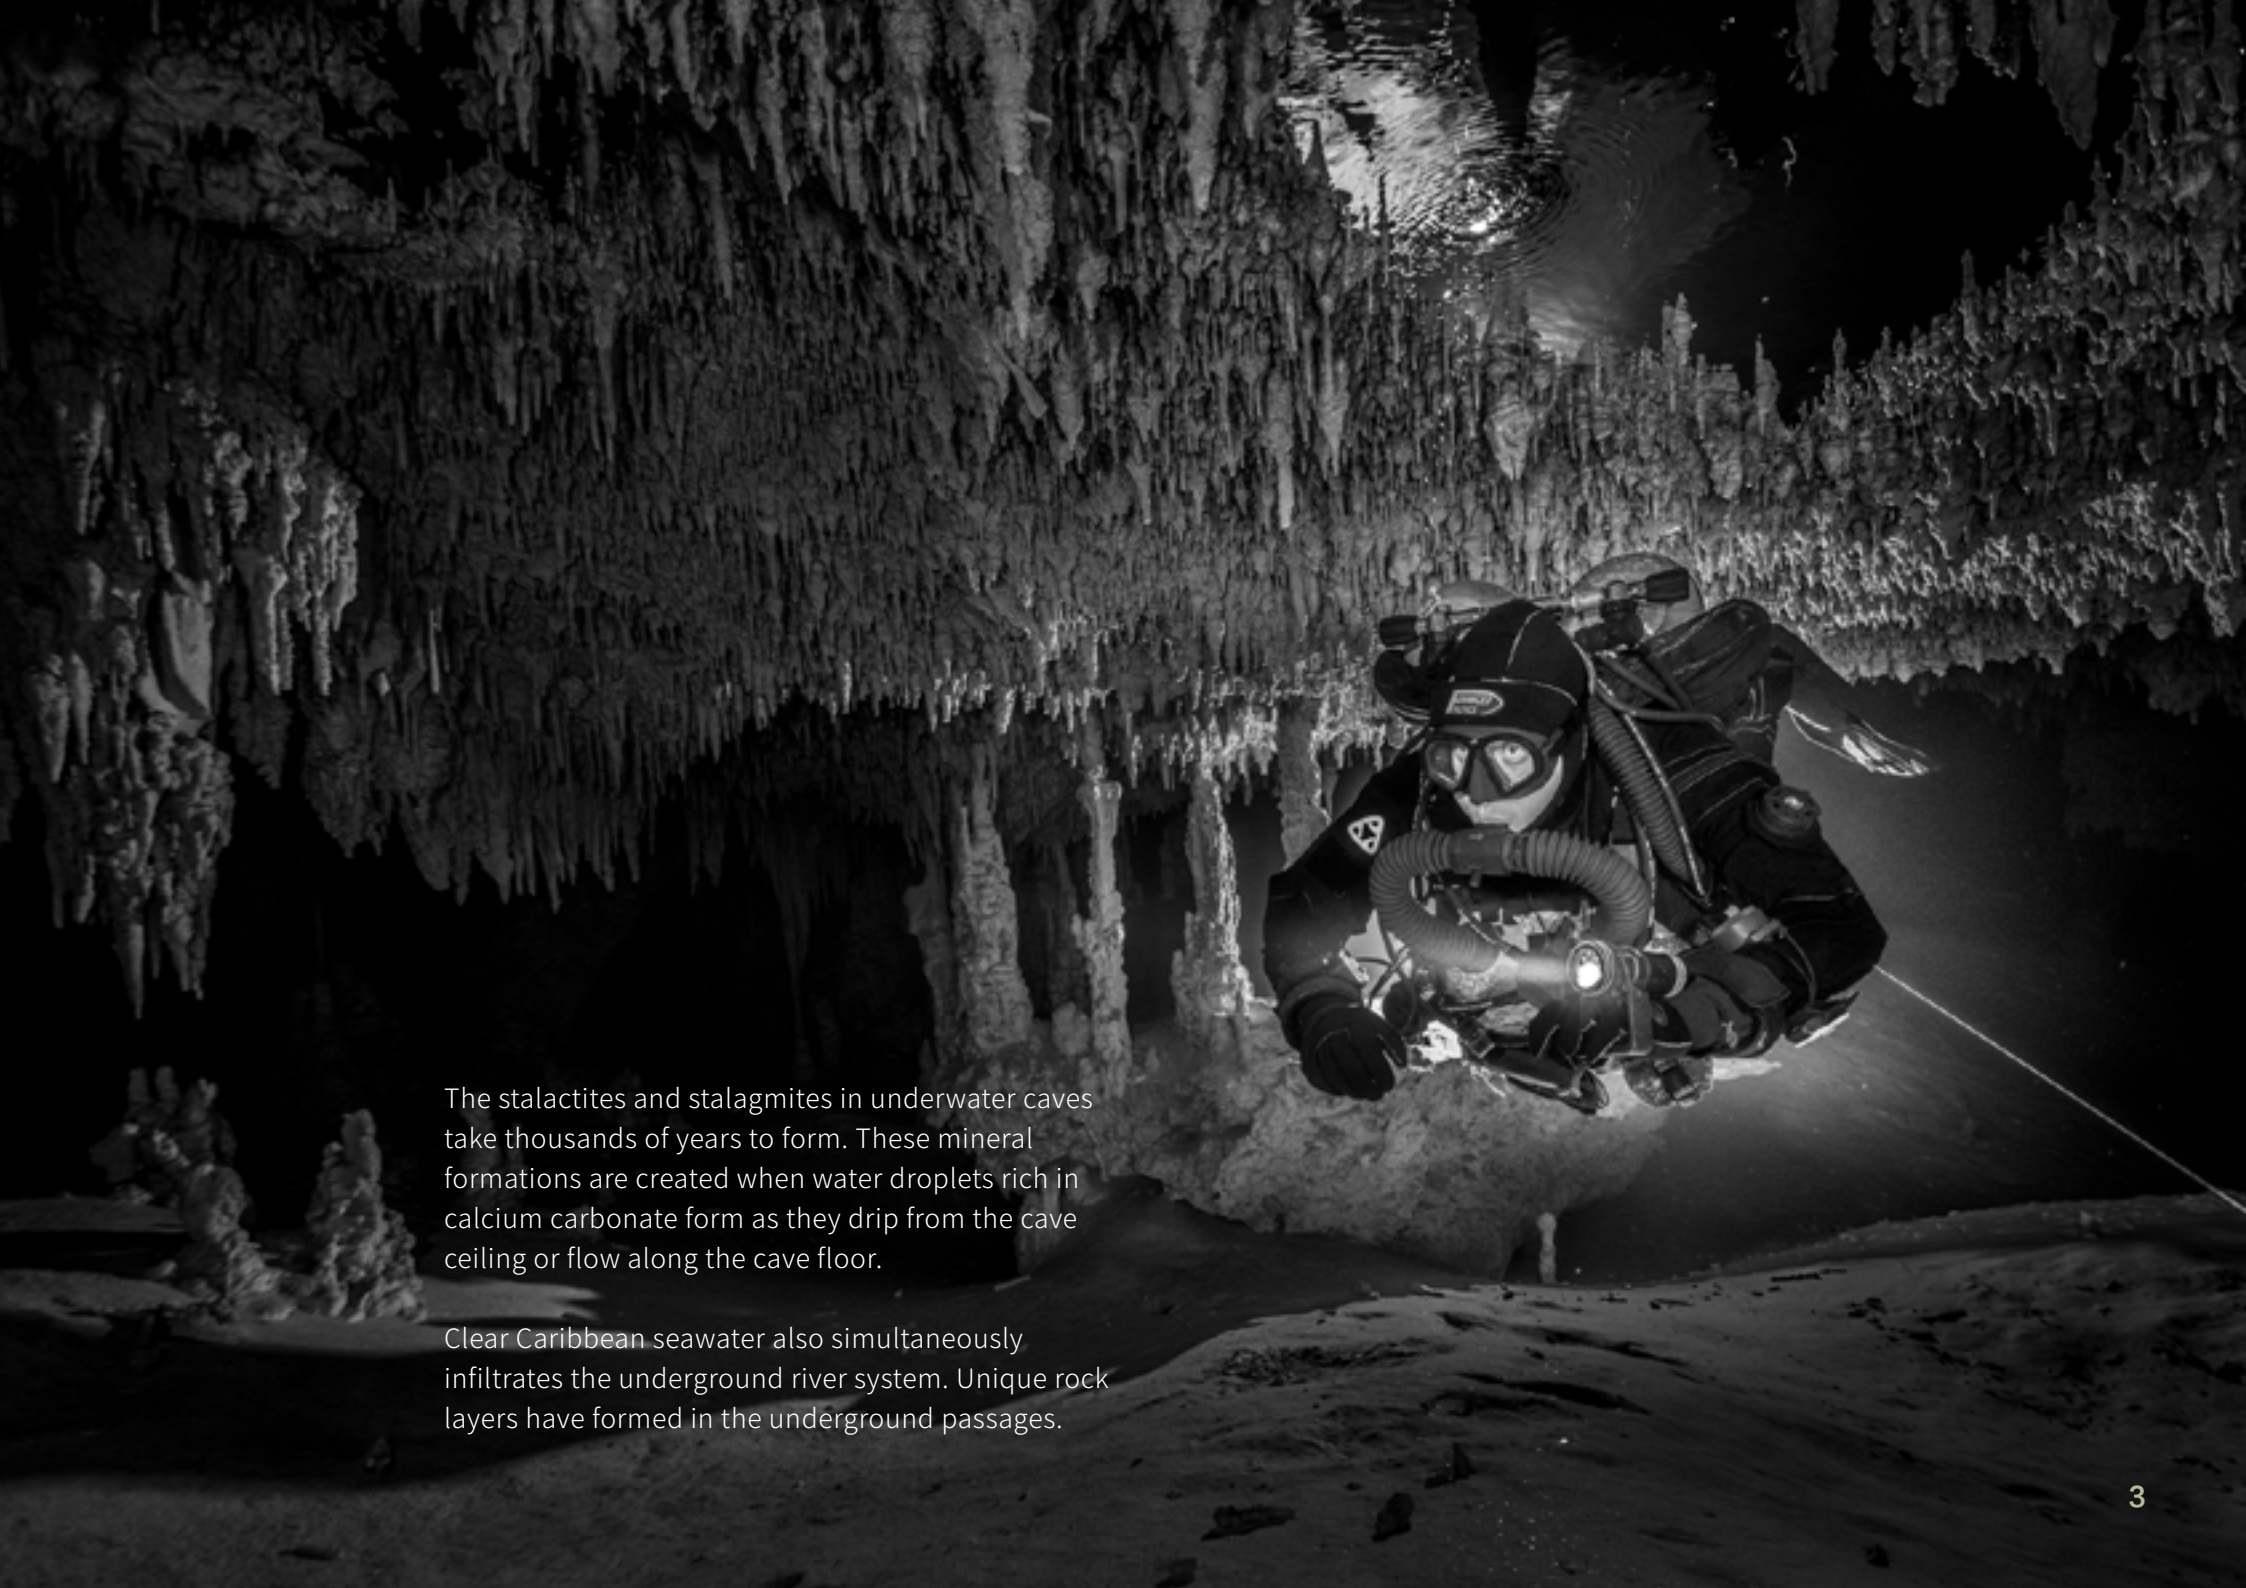

AKUANA

DIVING INTO THE ANCIENT WORLD

2025
CATALOGUE

The Maya ruins on the Caribbean coast and in the jungle continue to tell the story of history. The Maya civilization, which arose in the jungle, dates back to the 10th century BCE. Beneath the jungle, the karst rock formations filter rainwater, and underground river channels, formed during the Ice Age, collect fresh water flowing into the Caribbean Sea. AKUANA accompanies divers as they enter the jungle, diving into the river of history.

A black and white photograph of a scuba diver in an underwater cave. The diver is positioned in the lower right, facing the viewer, with a bright light illuminating the scene. The cave walls are covered in numerous stalactites hanging from the ceiling and stalagmites rising from the floor. The water is clear, and the overall atmosphere is mysterious and ancient.

The stalactites and stalagmites in underwater caves take thousands of years to form. These mineral formations are created when water droplets rich in calcium carbonate form as they drip from the cave ceiling or flow along the cave floor.

Clear Caribbean seawater also simultaneously infiltrates the underground river system. Unique rock layers have formed in the underground passages.

OUR BRAND

Founded in 2013, the technical diving products brand AKUANA was established by two diving explorers. Over time, the brand has grown alongside other explorers, sharing their passion and providing the most reliable and streamlined equipment. AKUANA inspires adventurers to continuously explore the unknown realms of our mysterious planet. AKUANA's products cover not only recreational and technical diving but also extend to various professional fields of commercial diving, aiming to provide the best support for divers in their underwater adventures and missions.

OUR ADVANTAGES

PROFESSIONAL:

Founded by experienced divers and engineers, our team boasts extensive expertise in technical diving.

GLOBAL CERTIFICATIONS:

All products undergo strict testing by both international and domestic certification bodies and are used in multiple diving systems.

CUSTOMER SUPPORT:

We provide professional technical training and after-sales services, ensuring that every diver enjoys the best experience.

COMPREHENSIVE SYSTEM:

We offer a one-stop product purchasing experience, with a range of products covering diverse diving fields to meet the needs of professional clients.

LOOKING TO THE FUTURE

We will continue to innovate with craftsmanship, advancing the development of technical diving equipment and empowering divers to explore deeper oceans and further unknowns. Whether you're new to technical diving or an experienced diver, we are your trusted partner.

CORE VALUES

INNOVATION DRIVEN:

As a National high-tech enterprise, We integrate cutting-edge technology with diving needs, continuously improving the performance and safety of diving equipment.

ENVIRONMENT AWARENESS:

Protecting the underwater world is our responsibility. We actively adopt eco-friendly materials and sustainable technologies in our product design and manufacturing to minimize the impact on marine ecosystems.

DREAM:

All of AKUANA's products originate from the dream of exploring, documenting, and protecting China's underwater caves. Providing better diving equipment for divers has always been our goal.

EXPLORATION:

Our testing team is dedicated to exploring extreme depths, complex structures, and heavily sedimented underwater caves. Exploration is at the heart of AKUANA and serves as the driving force behind our progress.

EXCELLENCE:

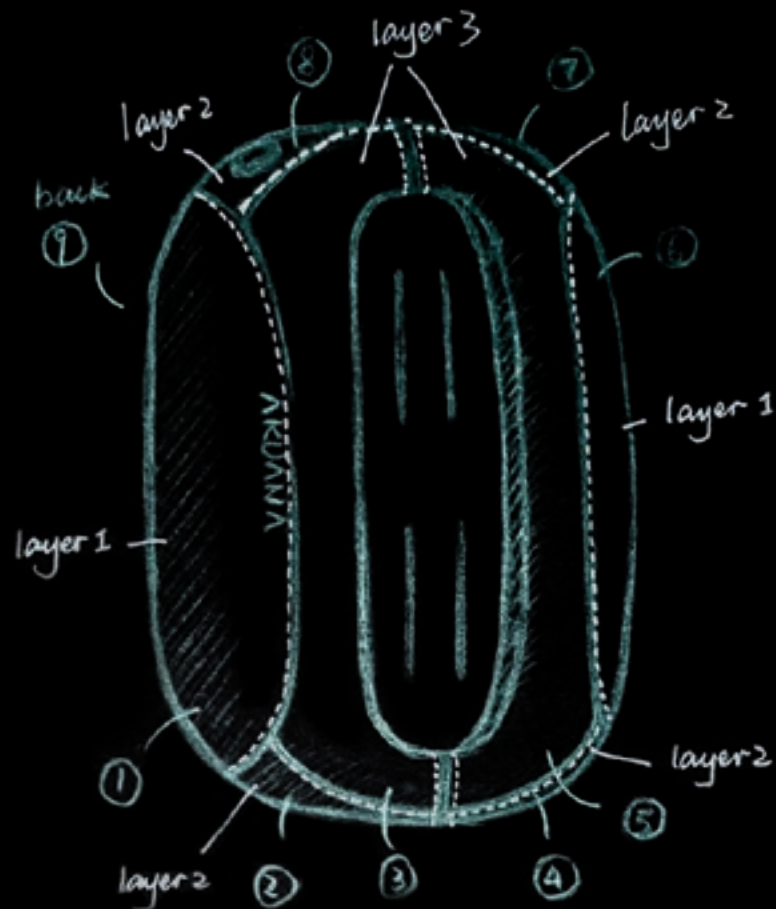

Rigorous standards for material selection, production, and testing ensure that every product is perfected. Safety is the core of technical diving, and we strictly adhere to international standards, collaborating with professional divers and technical teams to create trustworthy products.

PASSION:

By always staying at the forefront of technology, guiding ever-changing demands, and maintaining our passion, we continue to innovate.

PRODUCT DESIGN

Product research and design capabilities are the cornerstone of AKUANA's foundation. AKUANA's product design philosophy revolves around providing high-performance, easy-to-operate, and durable diving equipment. During product design, we drive innovation with experience, ensuring that newly designed products meet the needs of divers in various environments. Each design reflects our commitment to safety, functionality, versatility, and product aesthetics. At the same time, we consider users' long-term interests and the environmental impact during the production and sales process.

ECO-FRIENDLY DIVING GEAR PROTECT THE OCEAN YOU LOVE

Our products are designed for divers who care about marine conservation, combining durability, functionality, and environmental responsibility to ensure you can dive while caring for our oceans.

ECO-FRIENDLY MATERIALS:

Made with recycled fabrics and sustainable 1000D Cordura material, reducing waste and minimizing environmental impact. Plastic-free packaging, using reusable materials.

DURABLE AND LONG-LASTING

Crafted with high-strength fabrics and metal components, reducing the need for frequent replacements and minimizing waste.

RESPONSIBLE MANUFACTURING PRACTICES

Employs low-impact production methods to reduce water pollution and carbon emissions.

VERSATILE DESIGN

Focuses on product expandability, meeting the needs of technical divers, instructors, and recreational divers alike while aligning with sustainable development principles.

Dive Responsibly, Protect Our Oceans!

WHY CHOOSE ECO-FRIENDLY GEAR?

The ocean is the cradle of life on Earth, covering over 70% of the planet's surface. It provides the oxygen we breathe, regulates the climate, and sustains countless species. However, due to human activities, the marine environment faces severe challenges:

Divers can play an active role in supporting ocean cleanup and marine life conservation. Together, we can reduce pollution and protect marine ecosystems, ensuring future generations can also enjoy the beauty of the underwater world.

HIGH-END MATERIALS AND PRODUCTION TECHNOLOGY

Materials undergo rigorous tensile test and meet the 0.37KN, The fusion of the materials must also undergo the tensile test and meet the 0.2KN

DUAL LAYER WING

Outer shell is made of cut-proof 1000D nylon.
Inner bladder is made of durable 210D nylon

LONG TERM WARRANTY

CUSTOMIZED LOGO AND COLORS

Akuana BCD is demanding diver's BCD. The design originates from Hogarthian equipment configuration which stresses simplicity. One size fits all divers and suits. The streamlined shape let you swim faster and with less effort. Soft shoulder and back pad make divers more comfortable. Weight system is simple and adjustable. K shape power inflater makes oral inflation super easy. Extensible corrugated hose help you deflate on the surface. Different color choices meet the demand of fashion icon.

SONIC 20/30 SINGLE TANK BCD

This model Incorporates modern design concepts into traditional diving products. Constant refinements and the application of advanced materials technology brought this new version to life.

Streamlined wing shape offers more lift on waist which makes diver easier to achieve balance underwater. Low profile valves, modern color collections and light-weight materials make SONIC a new generation of Akuana BCD. Careful attention to details, together with long term production experience, have culminated in designs of rugged functionality.

FEATURES:

- New underwater glow light, compatible with inflatable bladders to enhance visibility at night or during the day. You can customize and arrange patterns as desired.
- Hogarthian design. Streamlined and Minimalism
- Soft PP harness makes it easier to adjust
- Patented slot weighting systems. Weight pockets included
- Quick-adjust shoulder harness tri-glide included
- Carbon fiber backplate and plastic tank bands ensure minimum weight
- Newly designed shape of the wing offers the best balance
- One-way membrane inside the dump valve prevents water getting inside when deflating
- Newly designed AKUANA logo on the wing cover
- Customized color and embroidery
- 5 stainless steel D ring
- Low profile valves

PARAMETERS:

- 1000D Polyester/Cordura
- Carbonfiber plate: 350g (Color, Black, White, Pink, Lake blue, Purple)
- BCD inflation hose (Color:Black, Pink, Lake blue, Purple, White)
- Carbon fiber plate weight: 350g
- Colors: Lake blue / Dark black / Purple / White / Pink / Peach fuzz / Oliver
- Lift: 20 or 30lb
- Weight: 3090g

PACKAGE INCLUDES:

- Glow light package (1 year warranty)
- A pair of small weight pockets (4kg weights)
- Stainless steel tri-glide and quick adjust trig-glide
- Equipment mesh bag
- Plastic tank bands
- Stainless waist buckle
- 5 stainless D ring

TALES 25/50 SINGLE / DOUBLE TANK BCD

Tales is a close friend of Sonic. It originates from the classic seal series BCD but incorporates the new designs of Sonic. Equipped with donut 360 wings, low profile valves and modern color collections, it represents the fusion of design and technology. Light-weight materials make Tales a travel friendly version. The newly designed EVA back pad offers best comfort. The 25lb is designed for single tank diving and the 50lb is designed for double tank diving.

SEAL 25/30 ELITE SINGLE TANK ALUMINUM VERSION

CORDURA

Scan the QR code to
choose the colors
customized available

This version is designed for advanced divers but seeking for a low budge BCD. One size can fit all divers. The streamlined shape allows you to get more kicking efficiency. The aluminum backplate is light and is coated with anti-corrosion materials. The patented weight system can help the diver achieve perfect trim. This version provides multi colors and promise of safety for all level of divers.

FEATURES:

- Recommended for training in warm water
- Patented slot weighting systems
- Hogarthian design. Streamlined and Minimalism
- One pair of trim weight pockets
- CNC processed aluminum backplate
- SS buckle tank clamp belt
- Optional carbon single tank adapter
- 5 stainless steel D ring
- Customized color and embroidery
- SS belt buckle
- One fits all sizes
- Light weight

PARAMETERS:

- Aluminum plate weight: 700g
- Lift: 25 or 30lb for single tank diving
- Weight: 4500g

PACKAGE INCLUDES:

- Stainless waist buckle and tank band
- A pair of stainless steel tank bands
- A pair of trim weight pockets (4kg weights)
- Equipment mesh bag

customized available

This version is made from Carbon Fiber and it is thus ultra-light but also extremely robust. This is the BCD for divers who are traveling a lot and require perfect fit. This version combines the streamlined design from Hogarthian with easy adjust ability of standard BCD. You can choose the quick adjust harness. The buckle is made from ABS to save the weight.

FEATURES:

- Hogarthian design. Streamlined and Minimalism
- Light weight design. Built for travelers
- Smart soft pad replaces the STA. Saves more weight
- Optional carbon single tank adapter
- 3 carbon backplate color choices: black / pink / white
- Customized color and embroidery
- One fits all sizes

PARAMETERS:

- Carbon fiber plate weight: 350g
- Lift: 25 or 30lb for single tank diving
- Weight: 3000g

PACKAGE INCLUDES:

- A pair of trim weight pockets (4kg weights)
- Stainless waist buckle
- A pair of Plastic tank bands
- Equipment mesh bag
- 5 stainless D ring

customized available

This version is a complete backmount set which includes a single tank donut, stainless steel D-rings, a standard harness, two tank straps with silver buckles. Equipped with soft shoulder and back pads, divers can wear this version without any suit in tropical waters. Carefully tailored shapes support reduced drag and greater in-water efficiency. The harness is a one-size-fits-all system for a customized fit.

FEATURES:

- Soft shoulder pad and back pad offer more comfort
- Optional carbon single tank adapter
- Recommended for using without wetsuit. The soft pad will protect you from scratching by the harness
- One pair of trim weight pockets
- Customized color and embroidery
- SS buckle tank clamp belt
- Patented slot weighting systems
- SS belt buckle
- 5 stainless steel D ring

PARAMETERS:

- Aluminum plate weight: 700g
- Lift: 25 or 30lb for single tank diving
- Weight: 5500g

PACKAGE INCLUDES:

- A pair of stainless steel tank bands
- Soft back and shoulder pad
- A pair of trim weight pockets (4kg weights)
- Equipment mesh bag
- 5 stainless D ring

customized available

This version is for dive shop seeking durable and budget products. The stainless steel plate provides enough integrated weight in tropical water diving. The plate is made of 316 stainless steel which is resistant to corrosion. The K-type inflatable valve is super easy to blow with the mouth. You can rely on our quality in any diving environment.

FEATURES:

- One pair of quick release waist weight pockets
- 316 stainless steel with hollow out logo
- Using the backplate as integrated weight saves trouble by carrying weights in warm water
- Optional carbon single tank adapter
- Durable and streamlined design
- Customized color and embroidery
- Recommended for training
- Smart soft pad replaces the STA
- One size fits all

PARAMETERS:

- Stainless steel plate weight: 2800g
- Lift: 25 or 30lb for single tank diving
- Weight: 5800g

PACKAGE INCLUDES:

- Optional carbon single tank adapter
- Stainless waist buckle
- A pair of stainless steel tank bands
- Equipment mesh bag

it's important for a BCD to be rugged. That's why our diving experts test our BCD under harsh conditions, both in laboratories and in dives around the world. This version is designed for divers who require more weight when diving in cold waters. No matter you wear drysuit or thick wetsuit, this version will provide the adequate buoyancy and reliability you need.

FEATURES:

- Soft shoulder pad and back pad offer more comfort
- Recommended for training in cold water
- One pair of quick release waist weight pockets can hold 6kg weights
- Smart soft pad replaces the STA
- Optional carbon single tank adapter
- 316 stainless steel backplate
- Customized color and embroidery

PARAMETERS:

- Stainless steel plate weight: 2800g
- Lift: 25 or 30lb for single tank diving
- Weight: 6300g

PACKAGE INCLUDES:

- A pair of stainless steel tank bands
- Soft back and shoulder pad
- A pair of quick release weight pockets (6kg weights)

Thousands of hours of testing in the water and the expertise of the design team make this version the best choice for diving explorers and public safety divers who are diving the extreme environments. Durability, Horgathian concept and Ergonomics dominated our design concepts. We are not satisfied with our achievement in the past. We have no compromises in the pursuit of excellence.

FEATURES:

- One pair of quick release waist weight pockets
- Recommended for training in cold water
- Soft shoulder pad and back pad offer more comfort
- Easy to clip multi-stage tanks
- Optional carbon single tank adapter
- 316 stainless steel backplate
- Customized color and embroidery
- Designed for double tank diving

PARAMETERS:

- Stainless steel plate weight: 2800g
- Weight: 6800g

VOYAGE 35 SINGLE TANK JACKET BCD

A comfortable, economical jacket BCD perfect for training and travel, with enough lift for most diving conditions. This is the first jacket bcd from AKUANA brand which features the same workmanship. The voyage 35 could be your first BCD choice that fits your expect from AKUANA.

FEATURES:

- Withstands the daily rigors of rental & training departments
- Durable 1000D denier fadeless nylon construction
- Two Velcro utility pockets
- 1 plastic D-ring on the right shoulder and 1 plastic D-ring on the left side for SPG
- SPG hose holding tunnel
- K-valve design, allowing easy oral inflation and single-handed operation
- Multiple deflation options: shoulder exhaust valve, bottom exhaust valve, and quick-pull deflation on the corrugated hose
- Velcro loop surface for identification
- Knife mounting slot
- Designated holder for the alternate second-stage regulator
- Back padding for enhanced comfort

PARAMETERS:

- 1000D cordura
- 3 sizes: S / M / L
- Lift: 31 / 37 / 39lb
- Weight: 2430g

PACKAGE INCLUDES:

- Manual
- Mesh bag
- Warranty card

HB (HUMMING BIRD) EXTREME SIDEMOUNT BCD

HB extreme sidemount is designed for cave divers who want to go through restrictions or restrictions or recreational divers who want to explore a new way of diving. Build by tried and tested technology, HB has the perfect streamlining and balance. Each component of the system was specifically designed and work with only who are properly trained. There are D rings on the waist strap preset in different places to allow for changes in tank buoyancy and control of cylinder position, even if carrying buoyant high helium mixes. The plates and harness system are specially designed for carrying equipment and one size will fit all.

CORDURA

FEATURES:

- 35lb lift capacity
- Bladder made of high-tech materials used for bullet proof vest
- Light weight and cut proof
- MOLLE weight system on the bladder.
- Nylon upper back plate. More comfortable and lighter weight
- Reversible inflator can be positioned on left or right side
- Low profile exhaust valve
- 8 low profile stainless steel D rings
- Including one pair of weight pockets and one pair of harness weight plate
- Customized butt plate to fix the lower corner of bladder and provide external clips
- 2 of stainless steel snap hooks on the waist harness. This snap hooks are used to clip stage tank and mesh utility bag
- Dual loop bungee system to hold the tanks close to body. Fit also for single bungee system

PARAMETERS:

- 400D Dyneema outer shell
- Lift: 35lb
- Weight: 3600g

PACKAGE INCLUDES:

- A pair of trim weight pockets (4kg weights)
- 8 stainless steel low profile D-rings

REGULATOR

AKUANA regulators are designed to deliver effortless airflow in different environments and are undergoing rigorous tests to ensure the superb reliability which earns the trust of recreational, technical and military divers.

AKUANA also offers different regulator packages which can be used in different configurations. The preset-up package saves divers a lot of trouble. Personalization is also a key feature which allows diver to design their own regulators. Divers can choose piston or diaphragm and a variety of colors.

Multi-colored high and low-pressure rubber hoses,
meeting color coordination requirements

Multi-colored Module combinations,
showcasing individuality.

FALCON 3 FIRST STAGE

Falcon3 is machined from brass with polished finishing or gun metal finishing which gives you the best corrosion resistance.

This piston first stage was designed by diving experts in Italy and made in China. There are 7 Pressure Ports, 2 HP and 5 LP ports on a swivel cap, for your personally preferred setting.

Whether diving a sophisticated re-breather or a simple open water system, you can create a configuration with Falcon3 first stage. Enjoy the smoothest breathing regulator, whether you are on the exploration dives or blue water fun dives.

GUN METAL

POLISHED FINISHING

FEATURES:

- Rotating swivel turret helps streamline hose distribution
- Air balanced flow-through piston design
- Balanced piston design allows the use of lighter and more sensitive
- Green Teflon coated piston spring
- Recommended for single tank and double-tank diving
- Adjustable intermediate pressure
- Oxygen compatible
- 316 stainless steel piston

PARAMETERS:

- Intermediate Pressure : 135-145 PSI
- Plastic parts colors: Black, Pink, White, Blue, Purple, Lake Blue, Oliver, Peach Fuzz
- Ventilation rate (lpm/200bar):1790
- High pressure ports: 2
- Low pressure ports: 5
- Connection: DIN 300 bar

PACKAGE INCLUDES:

- Service kit
- Manual
- Warranty card

WARRANTY:

- Limited life-time (Annual Service record requested)

Falconet 3 second stage

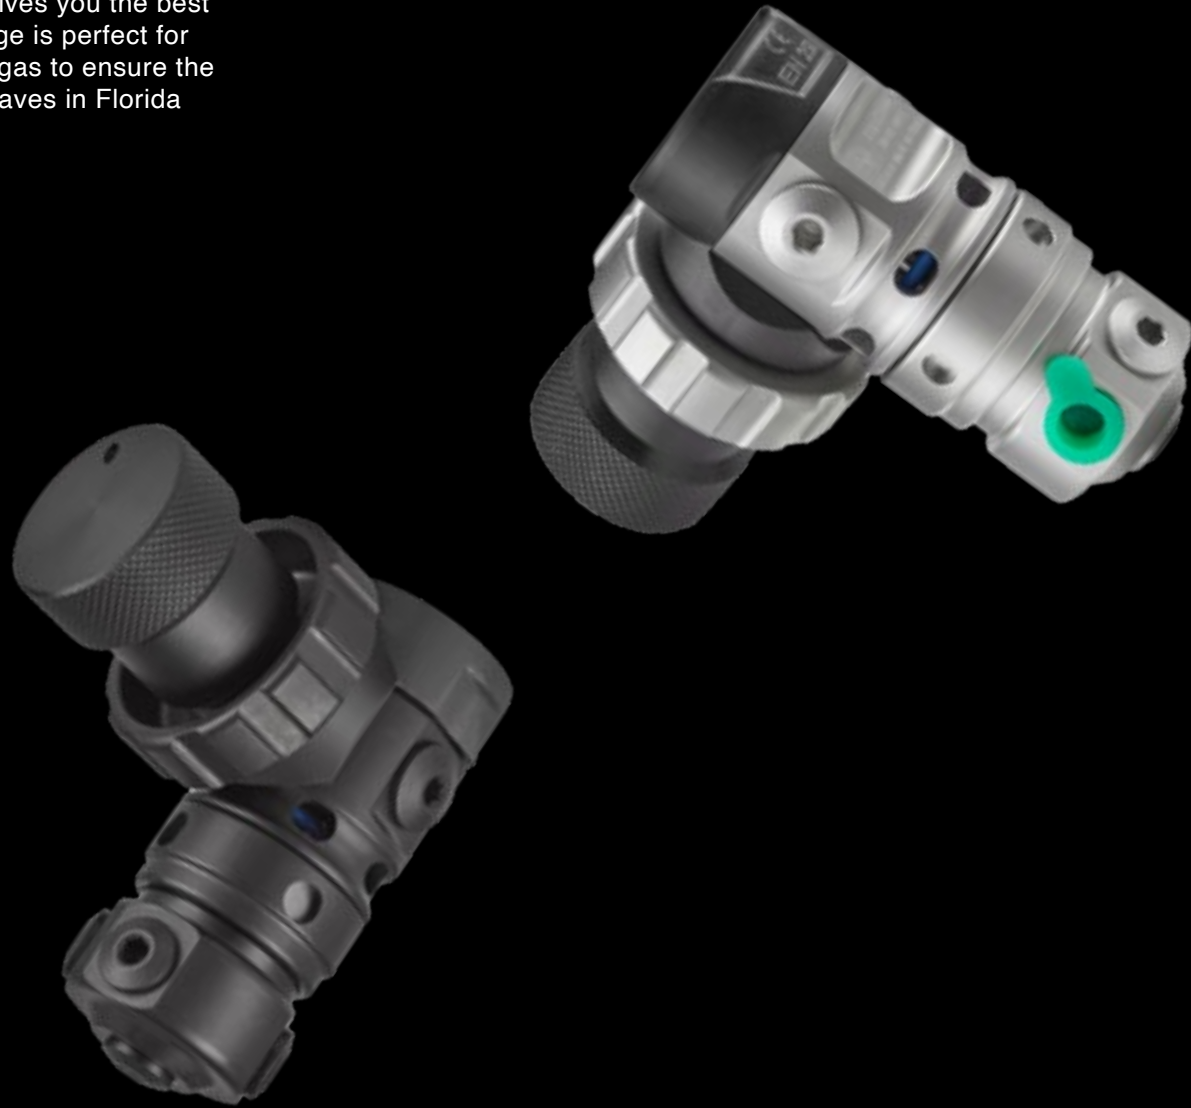

Exploring caves in Mexico
Falcon 4 first stage

FALCON 4 FIRST STAGE

Falcon4 is machined from stainless steel which gives you the best durability. This compact and light weight first stage is perfect for travel divers. It delivers much more than enough gas to ensure the smooth breathing. It was tested in the high flow caves in Florida where divers are struggling to swim forward.

FEATURES:

- Rotating swivel turret helps streamline hose distribution
- Air balanced flow-through piston design
- Designed for travelers and explorer diving in remote area
- Compact and Light weighted
- Made of Stainless steel
- Fixed intermediate pressure
- Oxygen compatible
- Teflon coated piston spring

PARAMETERS:

- Finishing: Black / Sandblasting
- Intermediate Pressure : 120-130 PSI
- Finishing: Black / Sandblasting
- Plastic parts: Black, pink, white, blue, purple, lake blue, Oliver, Peach fuzz
- Ventilation rate (lpm/200bar): 1450
- High pressure ports: 2
- Low pressure ports: 5
- Connection: DIN 300 bar
- Weight: 550g

PACKAGE INCLUDES:

- Manual
- Warranty card

WARRANTY:

CERTIFICATION:

Small and compact

Teflon spring and stainless steel piston

For recreational diving, a DIN connection first stage maximizes safety by preventing air leaks.

Streamlined equipment configuration can
minimize environmental impact.

FALCON 5 FIRST STAGE

This first stage regulator is designed for polluted water or cold environments, meeting the special requirements of extreme cold conditions to ensure diver safety. It features an integrally cast structure, making it robust and durable. The streamlined hose outlets reduce the risk of entanglement. It can be used with a variety of diving regulator configurations.

FEATURES:

- Equipped with a special anti-freezing system to isolate water from internal components, reducing the risk of freezing.
- Made of chrome-plated brass to resist physical damage and corrosion in extremely low temperatures.
- Uses O-rings and other seals with superior cold resistance to prevent hardening in low temperatures.
- Balanced first stage design ensures stable and adequate airflow.
- Suitable for use with EAN40 or lower oxygen mixes.
- Optional ice-diving version with an additional environmental sealing chamber.
- It is easy to adjust intermediate-pressure

PARAMETERS:

- Material: Chrome-plated brass
- Low-pressure ports: 4
- High-pressure ports: 2
- Weight: 700g
- Airflow rate (Lpm/200bar): 1600
- Mid-pressure range: 135-145 PSI
- Cylinder connection: DIN (300bar)
- Operating temperature: 4°C or higher
- -2°C (ice-diving version)

PACKAGE INCLUDES:

- User manual
- Warranty card

WARRANTY:

- Limited lifetime warranty (requires annual maintenance).

MADE IN:

- Italy

CERTIFICATION:

Suitable for single or twin-cylinder diving, with downward facing streamlined hoses.

Top anti-freeze design with adjustable intermediate pressure.

FALCONET 2 SECOND STAGE

Falconet2 is a light weight, durable and balanced second stage perfect for all level divers. It is equipped with both a venturi lever and a gas volume knob. Combined with its customized colors and futuristic design, it will be sure to attract the attention of other divers and photographers.

The “easy maintenance” design makes this an ideal regulator. Technical divers can fix the problem on site even underwater without any tools.

GUN METAL

Balanced design ensures the smooth breathing

Multi-color choice

Venturi valve and air flow knob

AKUANA offers reliable regulators, allowing
you to become one with the ocean.

FALCONET 3 SECOND STAGE

This small and compact second stage is made for divers who are traveling around. Falconet 3 is designed by AKUANA with the belief that simple structure is the most reliable. It is pushed to market after rigid test.

FEATURES:

- Venturi lever to prevent leaking
- High comfort mouthpiece
- Air balanced flow-through design
- Oxygen clean
- Light and compact

PARAMETERS:

- Flow rate: 55 SCFM (air supply: 3000 PSI)
- Intermediate Pressure : 145 PSI
- Colors: Black, White, Purple, Lake Blue, Pink, Peach fuzz
- Cracking Effort: 1.8-2.0 CIW (Column inches of Water)
- Certified to use above 10 degree
- WOB @ 50M: 0.8 J/L
- Weight: :280g

PACKAGE INCLUDES:

- Service kit
- Manual
- Warranty card

WARRANTY:

- Limited life-time (Annual Service record requested)

MADE IN:

- China

CERTIFICATION:

Light weight and compact

Venturi lever to prevent free flow

OW REGULATOR PACKAGE

AKUANA regulators are designed to deliver effortless airflow in different environments and are undergoing rigorous tests to ensure the superb reliability

This set is ideal for beginners, warm waters and traveling divers looking for a reliable travel-friendly dive regulator. If you don't like hiring regs on holiday all the time and want to have a colorful regulator for vacation photos, this regulator may be a great choice.

SPECIFICATIONS:

- Choose the colors for the hoses (black, white, blue, pink, Lake blue, Yellow)
- Choose any first stage and second stage combination
- Weight: 2700g

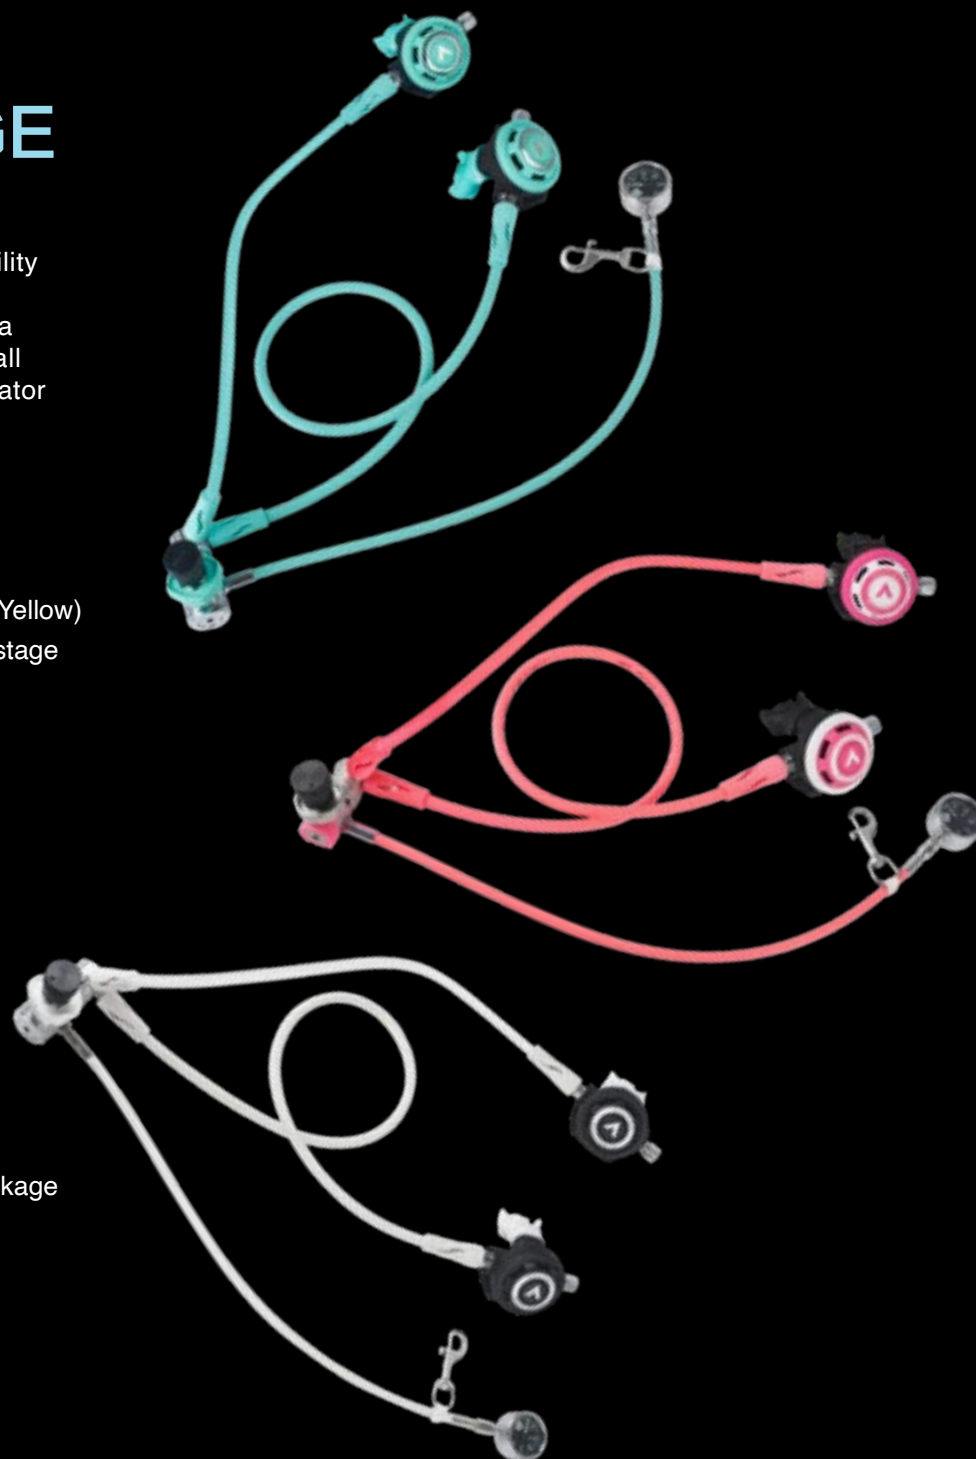

PACKAGE INCLUDES:

- 1 of 101cm low pressure hose
- 1 of 76cm low pressure hose
- 1 of 61cm high pressure hose
- 2 of second stages
- 1 of bolt snap
- 1 of first stage
- Regulator bag
- Warranty card
- Manual

WARRANTY:

- According to specific item in the package

CERTIFICATION:

HORGA REGULATOR PACKAGE

AKUANA Horga is designed for divers with DIR or Hogarthian concept. The long hose makes it easy to share the gas. You can switch primary and backup second stages easily and rapidly. This is important when you are making technical diving in the future.

SPECIFICATIONS:

- Multi-color hose protector (Lak blue, Purple, White, Black, Pink, Yellow)
- Choose the colors for the hoses (Black, white, pink, blue, lake blue)
- Choose any first stage and second stage combination
- Weight: 3000g

PACKAGE INCLUDES:

- 1 of 200 cm low pressure hose
- 1 of 56 cm low pressure hose
- 1 of 61cm high pressure hose
- 2 of second stages
- 1 of pressure gauge
- 1 of first stage
- 2 of bolt snaps
- Regulator bag
- Warranty card
- Manual

WARRANTY:

- According to specific item in the package

CERTIFICATION:

DOUBLE TANK REGULATOR PACKAGE

AKUANA double tank regulator package is optimally equipped for harsh diving conditions for demanding divers who are doing technical diving in the deep ocean, caves or wrecks. This package is also widely used in military training and rescue teams. Double tank regulator package provides 2 of independent breathing systems which mean more safety margin.

SPECIFICATIONS:

- Choose the colors for the hoses (black, white, Lake blue)
- Choose Fn2 or Fn3 second stages
- Choose F3, F4 or F5 first stages
- Weight: 3800g

PACKAGE INCLUDES:

- 1 of 200 cm low pressure hose
- 1 of 56 cm low pressure hose
- 1 of 61cm high pressure hose
- 2 of second stages
- 1 of pressure gauge
- 2 of first stage
- 2 of bolt snaps
- Regulator bag
- Warranty card
- Manual

WARRANTY:

- According to specific item in the package

SIDEMOUNT REGULATOR PACKAGE

AKUANA sidemount regulator package is designed for divers who seek streamlined and redundant diving system which is not stressing your back. This system is also essential for exploring restrictions in the caves or wrecks. You can customize your gears to suit you. Our package is preassembled and tested. This saves you a lot of troubles.

F4+FN2

SPECIFICATIONS:

- Choose the colors for the hoses (black, white, Lake blue)
- Choose Fn2 or Fn3 second stages
- Choose F3 or F4 first stages
- weight: 3800g

PACKAGE INCLUDES:

- 1 of 200 cm low pressure hose
- 1 of 61cm low pressure hose
- 2 of 15cm high pressure hoses
- 2 of second stages
- 2 of pressure gauges
- 2 of first stages
- 1 of bolt snaps
- Regulator bag
- Warranty card
- Manual

STAGE REGULATOR PACKAGE

AKUANA stage regulator package is designed for technical divers who want to carry more stage or deco tanks. The package is preassembled and tested. The package is oxygen clean which means it can be used with pure oxygen.

SPECIFICATIONS:

- Choose the colors for the hoses (black, white, blue, yellow, Lake blue, pink)
- Choose any first stage and second stage combination
- Weight: 2600g

PACKAGE INCLUDES:

- 1 of 40inch (101 cm) low pressure hose
- 1 of 15cm high pressure hose
- 1 of second stage
- 1 of pressure gauge
- 1 of bolt snaps
- Regulator bag
- Warranty card
- Manual

WARRANTY:

- According to specific item in the package

CERTIFICATION:

DRYSUIT INFLATION PACKAGE

This package is designed for divers who want to have independent drysuit inflation which avoid inflating helium into the drysuit when making deep dives.

This regulator will not add unnecessary bulk to a drysuit inflation configuration. The first stage is equipped with an OPV to give an additional margin of safety in the event of a first stage failure. Drysuit inflation hose included.

FEATURES:

- Package includes everything you need
- Can be fixed on the backplate
- Compact piston first stage with OPV
- Low profile tank valves
- Compact SPG

SPECIFICATIONS:

- Weight: 2330g

PACKAGE INCLUDES:

- 1L Aluminum tank. 230bar working pressure
- 22inch (56cm) low pressure inflation hose
- First stage and SPG
- Riggings to the backplate

WARRANTY:

- According to specific item in the package

DRYSUIT

Akuana drysuit is made by explorers for demanding divers. Every detail is considered and improved. The drysuit designs focus on keeping you DRY, durability and a full range of motion.

This drysuit ensures highest performance while diving in many different underwater environments, using recreational or technical gear.

Standard model has diagonal YKK aqua-seal zipper. quick-exchange neck and wrists , reinforcement on knee and crotch , multi-purpose cargo pocket with colorful bungee strings to mount the equipment, telescopic torso, suspenders with pockets for small items.

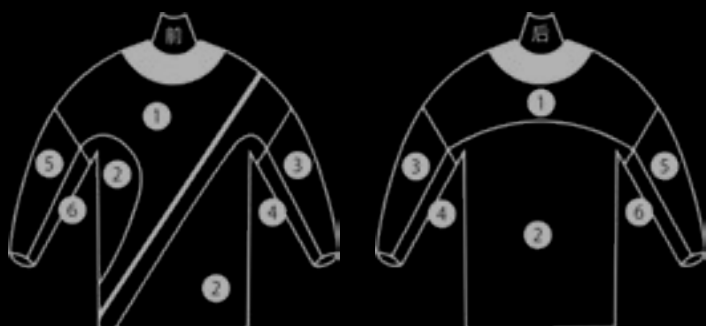

Diving in China's karst landscapes is inseparable from the protection of a dry suit.

Despite the warmer water temperatures, prolonged exploration of Mexico's underwater caves filled with stalactites requires proper insulation.
Pangong Dry Suit

MATRIX DRYSUIT

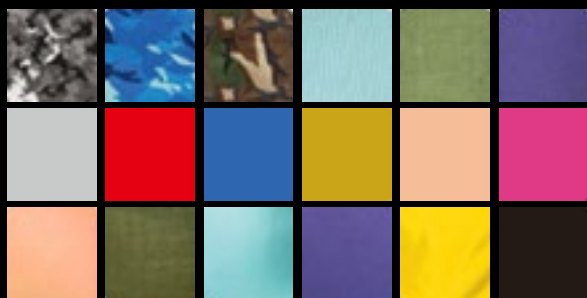

Akuana Matrix drysuit is a classic model which is proven to be reliable in the past 10 years. Every detail is considered and improved. The drysuit designs focus on keeping you DRY, durability and a full range of motion. This drysuit ensures the highest performance while diving in many different underwater environments, using recreational or technical gear. Standard model has customized sizing possibility which ensures the fit. Matrix are equipped with diagonal YKK aqua-seal zipper, quick-exchange neck and wrists, reinforcement on knee and crotch, multi-purpose cargo pocket telescopic torso and suspenders with pockets for small items. Matrix drysuit is designed on international cutting which has the short warm and double layers in chest area. This means that water can drain right after you surface. And you can choose different colors(Based on BCD cordura material)

CORDURA

PANGONG DRYSUIT

Pangong drysuit is named after the exploration dive in pangong lake which is at 4200m altitude. This exploration is the challenge for both the equipment and the divers. What this drysuit offers is a durable but very stretchy drysuit which gives a streamlined fit. It also allows for a full range of movement and the low-profile design reduces drag underwater. It is made of two different materials which are ultra-durable and provides optimum resistance to punctures and tearing

KOALA 300 UNDERGARMENT

Koala 300 is a stretchable, breathable and compression-resistant fleece that provides warmth without bulk. It also maintains insulating values at changing depths allowing the diver's core temperature to remain stable. It can accommodate the pee valve hose and heating vest hose.

FEATURES:

- Incorporates quick-drying characteristics for rapid evaporation, keeping you dry and comfortable
- The one-piece design delivers maximum warmth
- Prepared for pee valve and heating vest fittings
- High 4-way stretch fleece means the garment is form-fitting and reduces bulk
- Low profile thumb loops to assist in donning
- Low profile fleece neck – Less volume when used under a dry suit.
- Gusseted crotch and armpits elevate freedom of movement.

INDEPENDENT RESEARCH

INNOVATIVE DESIGN

EASY TO OPERATE

AKUANA designs and manufactures high quality technical diving equipment that you can depend on. AKUANA electronics include computers, lights and heating vest.

Computers stand for our independent research and development ability. It incorporates all the new technology.

Lights are machined from heavy-duty aluminum, making them both lightweight and durable. Different light heads and battery packs are interchangeable. Lights are designed for both sidemount and backmount configurations

Heating vest provides 3 hours* of long-lasting warmth. Indulge yourself in the only vest on the market with 50m waterproof testing.

ELECTRONICS

Opah X heating vest with wireless control

Thorough planning and reliable equipment are the keys to ensuring safety in cave diving.

OTTER DIVING COMPUTER

Otter is an advanced dive computer with colorful LCD screen. The algorithm incorporates Buehlmann ZHL16C and Deep Stop. Otter has 3 diving modes: Air (For recreational diving), Nitrox (Single gas up to 40%) and Gauge mode.

We design this computer that is easy to use for divers of all experience levels. You can read the essential data even in the very low visibility and dark environment. The full color display is also important for elderly divers. Battery life per charge is up to 20 hours on medium brightness level. USB wireless charging station is included. In the Dive Log menu, a diver can quickly view detailed graphs and dive profile.

Clear display will enhance the safety Otter computer

FEATURES:

- 2 inch colorful LCD display
- Sound and vibration alerts ensure the dive safety
- Multiple languages
- 100 meter waterproof
- Air / Nitrox / Gauge mode
- Electronic compass
- Buehlmann ZHL16C

PARAMETERS:

- Battery : lithium, Wireless recharging
- 20 hours use per charge (20 dives for recreational divers)
- Working temperatures: 0-45°C
- Depth: 0-100m
- Size: 81*52*28mm
- Weight: 330g

INCLUDES:

- Manuals

WARRANTY:

- 2 years

MADE IN:

- China

Easy to read under water

Visual and vibration alert

Silicon belt for both drysuit and wetsuit.

OPAH X HEATING VEST

Opah W is the heating vest made for wetsuit diving, surfing and other water sports using our proprietary underwater heating innovations and an unparalleled safety design.

Our underwater remote control haptic feedback system allows you to easily control your suit's temperature even when it's layered under other bulky protective gear.

Opah will keep you warm even in the extreme environment

FEATURES:

- Each suit is made of stretchy materials and comes standard with Velcro allows more adjustment possibility.
- Waterproof battery quick-connection is redesigned to withstand the seawater corrosion
- 2 different levels of output (60W / 30W). Maximum output: 60W
- Over-heating protection
- Carbon fiber heating in both front and back
- Maximum depth: 50M
- Maximum duration: 2.5 hours (30W output), 1.5 hours (60W output)
- Heat isolation pocket for lithium battery
- Lithium battery: 49Wh x 2

PARAMETERS:

- Output: 30W / 60W
- Depth rating: 50M
- Highest temperature: 42
- Size: XS / S / M / L / XL

INCLUDES:

- Manuals
- Controller
- Battery

WARRANTY:

- 1 year
- Battery: 6 months

MADE IN:

- China

CERTIFICATION:

WARNING: This heating vest can only be used with wetsuit. You can not use in the dryuit.

CONDOR 2100W LIGHT

C2100W light was put into the technical diving market 6 years ago. it has won the reputation of durability and versatility.

C2100W is machined from high quality aluminum which makes them not only lightweight but also robust. The light has wide angle mode for video and focus mode for communications. Selections of light heads and battery packs fulfill most of your adventurous needs

FEATURES:

- Choice of 3 pack battery without the cable. This is for the sidemount divers
- Two light models: focus and video models
- 150m waterproof
- Push to switch on button

PARAMETERS:

- Duration 3 battery pack / 6 battery pack: 1.5 / 3hours (video light
- 2100lumen) 3 / 6hours (spot light 1000lumen)
- Dimensions: 54mm (Head-dia.) * 62mm (Length)
- Dimensions (6 batteries pack): 52 mm (Head-dia.) * 140mm (Length)
- Dry weight: 1050g (with 6 batteries pack)
- Underwater Weight: 400g (with 6 batteries pack)
- 3 or 6 *18650 rechargeable lithium battery pack
- Video light two output modes- 2100/1000 lumen
- Focus two output modes-1000/500 lumen
- 18W: Max 2100 lumen @5500 Kelvin
- Beam angle: 110/10 degree
- Patented mechanical button switch

INCLUDING:

- Delrin full adjustable handle
- Tools
- Silicon
- Manuals

WARRANTY:

- 2 years

MADE IN:

J1500 BACKUP LIGHT

J1500 has two output mode: High and low. High mode is mainly used by experienced divers as a primary dive torch which offers 1500 lumen brightness. This compact dive light is perfect for tech divers and cave divers as backup light also. The 300 lumen output can last for 6 hours.

FEATURES:

- Low output mode makes it perfect for backup torch in the cave diving
- Rugged aluminum body features a rugged matte black finish
- Patented Push-button switch is easy to activate even when wearing gloves
- Colored battery status indicator(Green/Yellow/Red)
- A depth rating of 492ft/150m ensures worry-free lighting in virtually all diving condition
- Super big lanyard hole design for bolt snap mount
- Equipped with SST40 LED
- The program prevents accidental activation.

PARAMETERS:

- Dimensions :38 mm (Body-dia)*155 mm (Length)
- Dry weight: 270g (with battery)
- Underwater Weight: 100g (with battery);
- Beam angle: 10 degree
- 2 different output :1500 /300 lumen
- Max output power: 13.5W
- Working voltage: 2.7-4.5V
- Duration: 1.5 /6 hours
- Use 1*21700 battery

WARRANTY:

- 2 years (battery 6 months)

AKUANA LIFE

In nature, we can find inner peace, slow down, and experience the essence of life. Let your spirit merge with the mountains, rivers, and lakes, savoring moments of tranquility and freedom. The purpose of AKUANA Life's products is to help you slow down in the outdoors, escape the noise, and embrace the purity of nature, making each moment filled with calm and beauty.

The design of the AKUANA Life series products is aimed at connecting the city with nature. These products are specially crafted for nature lovers, making everyday life closer to nature. They feature a design that is simple yet sophisticated, combining functionality and aesthetics.

CAPY 20 DAY PACK

This outdoor bag is designed for water activities and daily use, made from TPU material that is not only waterproof but also lightweight. During water sports or activities near water, items that need to stay dry can be stored in the bag. After the activity, wet clothes or other gear can be placed in the bag, keeping the interior of your car dry.

FEATURES:

- Ultra-lightweight
- Waterproof TPU material
- Elastic mesh for securing fins
- Internal compartmentalized storage space
- Shoulder strap with a slot for phone storage
- Horizontal and vertical straps to secure the opening of the waterproof backpack
- Soft shoulder padding for added comfort

PARAMETERS:

- Weight: 418G
- Size: 600x400MM

WARRANTY:

- 2 years

T-800 TITANIUM SCISSORS

This titanium alloy scissors is designed for diving, everyday use, and outdoor activities. It can serve as an underwater cutting tool, a fishing tool, or even as an emergency medical shear thanks to its curved tip design.

FEATURES:

- Made of titanium alloy, rust-proof and lightweight
- Includes a sheath that can be attached to straps
- Sharp blade edges
- Finger ring at the handle end for one-handed cutting of entanglements
- Blunt-tip design for added safety to prevent injuries

PARAMETERS:

- Weight: 118G
- Size: 195x100MM

WARRANTY:

- 2 years

BENNIE

Keeping your head warm is essential during outdoor activities or after diving, and AKUANA's Bennie helps you blend into nature.

FEATURES:

- Keeps the user's head warm in cold areas or after exiting the water
- Stretchable material
- Dark blue color

PARAMETERS:

- One size fits all

FEATURES:

- Made of pure titanium, lightweight and durable
- Round mouth
- Double wall vacuum insulation (Do not heat directly over fire)
- Can be used to make tea and hang coffee.
- 450 ml

A woman with long blonde hair, seen from behind, stands in a lush tropical jungle. She is wearing a teal wetsuit and a large silver scuba tank. She is holding a black camera in her right hand. In the background, a large, weathered stone structure, possibly a ruin, rises above the dense foliage. The sky is overcast.

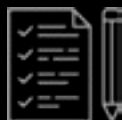

Our products carry the craftsmanship and artistry of explorers. Every product we launch is a perfect blend of functionality and aesthetics. From exquisite craftsmanship to meticulous design, each piece tells your unique story. AKUANA is not only a guarantee of diving safety but also a legacy of the explorer's spirit to overcome challenges and pursue the unknown.

CUSTOMER SERVICE

Welcome to our After-Sales Service Center. Customer service is our top priority, and all our products are designed around customer needs and satisfaction. In 2025, we upgraded our after-sales repair center to ensure the availability of qualified parts, skilled technicians, and advanced testing equipment, allowing users to enjoy high-quality and timely services. At the same time, we are continuously expanding after-sales centers across regions to improve service convenience.

OUR SERVICES

Product Repairs and Annual Maintenance

Starting in 2025, AKUANA-certified service centers will be equipped with professional testing equipment and technical teams to ensure your diving gear remains in optimal condition.

Return and Exchange Services

Quick return and exchange services are provided based on warranty policies and product conditions, protecting your rights.

Technical Support

Remote support is available to help with product usage issues, including operation guides, assembly instructions, and troubleshooting. Offline dealer networks also provide product training and related diving courses.

Spare Parts Replacement

Starting in 2025, authorized service centers will stock common replacement parts to reduce repair times.

Warranty Service

All products, both within and beyond the warranty period, are eligible for lifetime warranty services, ensuring complete accessory support and long-term usability.
